

1997

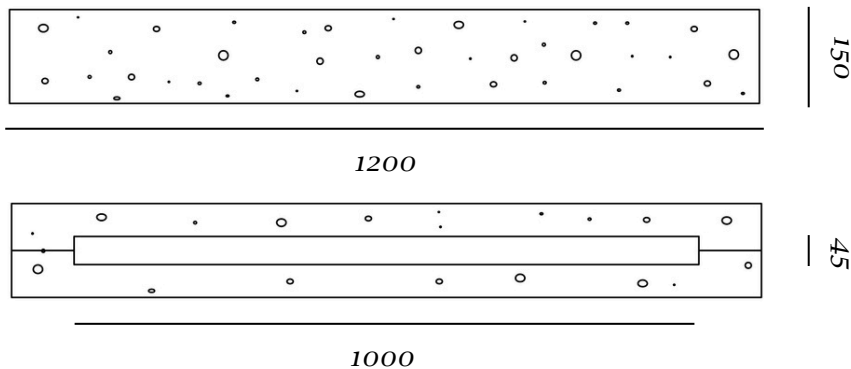

The light, generated internally, illuminates the metal tunnel from side to side, making its way through the slits in the surface. The back of the lamp has a cavity to accommodate the light band. Holes of varying diameters create a lively play of light projected into the room.

Handcrafted piece made with the utmost attention to detail respecting materials, people, places.

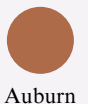

Our products are designed and manufactured in the town of San Giovanni Rotondo, Italy.

## DIMENSIONS [MM]

## MATERIALS AND FINISHES
